Beauty
That Endures...

LUXURIOUS **BATH** COLLECTIONS

WE BELIEVE IN THE POWER OF WATER.

Each day, we study the ways in which people interact with water. We learn from our observations. And then, we innovate.

Working in tandem, our engineers and designers merge new technologies with equally novel product designs. We ensure durability, by testing our products again and again – backing them with comprehensive warranties, and a wide selection of repair and replacement parts. And every step of the way, we focus on sustainability.

By constantly crafting bold styles and revolutionary technologies, we are creating a better way to experience water.

PRODUCT CATALOGUE

FUNCTIONALITY ASSURED

All **COTO** products use the finest components, from silky smooth valve cartridges to aerators at the end of spout - all are designed to improve the experience of using our taps these small things might not be immediately noticeable but add up, collectively to make a good design, great.

1) Water Aeration

All aerators used to add bubbles to the water leaving your tap. these innovations in fluid technology keep your water flow in a controlled and save water.

2) Valve Cartridges

All cartridge designs are tested for over 2,00,000 cycles before we will pass them for use within the taps. this means that under normal use conditions your tap valves have proven that they will work for many years to come.

3) Finishing Quality

We use traditional hand polishing techniques which ensure perfect blemish free surfaces and crisp edges. our hand treatment does not end there - we use hand plating for chrome plating. we know it is more expensive but it's finish is richer and more durable.

4) Smooth Rotating Handle

Precise and effortless water control for a lifetime of smooth and comfortable faucet handling.
